

CISO As a Service

Cyber security expertise at your fingertips

Rapidly enhance your cyber security defence and response capabilities by adding an experienced, qualified cyber team to your organisation.

With the ever evolving Cyber threat landscape, no organisation, large or small, is immune to a cyber breach. Strong security leadership is more crucial than ever. However, finding and retaining skilled security leaders in-house is challenging due to the industry's shortage of cybersecurity skills. Our CISO as a service team offers a viable solution by providing on-demand access to expert security leadership, without the worry of staff turnover. We take away the headache of managing key cyber related areas to assist with securing the organisation.

No matter where your organisation is on its cyber journey, VISO can build and manage a program for cyber security improvement in line with best practices.
